Exhibition Centre

Who Is This For?

This pre-conference day highlights emerging diagnostics and treatments that are redefining small animal oncology.

Designed for advanced general practitioners, residents and specialists, the program emphasises practical, practice-changing insights from leading international experts.

Dr Claire Cannon

Registered Specialist in Veterinary Oncology
Senior Lecturer, University of Melbourne

- Liquid biopsies, genomics and mutation-based diagnostics
- Tyrosine Kinase Inhibitors
- Canine Phaeochromocytoma

Dr Sarah Wetzel

Registered Specialist in Veterinary Oncology
ACVR Veterinary Radiation Oncology Resident

- The Old, The New, and The Upcoming: Advancements in Radiation Therapy

Dr Sita Withers

Registered Specialist in Veterinary Oncology
Senior Lecturer, Adelaide University

- Canine Lymphoma - Moving on from "B is better, T is terrible"
- Updates in Cancer Immunotherapy

Dr Philippa McLaren
